Long-term depression
Salivary secretion
Endocrine and other factor-regulated calcium reabsorption
Gap junction
Long-term potentiation
Glutamatergic synapse
Gastric acid secretion
Retrograde endocannabinoid signaling
Cocaine addiction
Dopaminergic synapse
Amphetamine addiction
Metabolic pathways
Huntington's disease
Cardiac muscle contraction
Oxidative phosphorylation
Parkinson's disease
Alzheimer's disease
Butanoate metabolism
Synthesis and degradation of ketone bodies
Terpenoid backbone biosynthesis
Synaptic vesicle cycle
Lysosome
Ribosome
Regulation of actin cytoskeleton
Focal adhesion
Leukocyte transendothelial migration
Mineral absorption
